UNITED STATES DISTRICT COURT
DISTRICT OF ARIZONA

SolarCity Corporation,

                Plaintiff,

    vs.

Salt River Project Agricultural Improvement and
Power District,

                Defendant.

Case No. 2:15-CV-00374-DLR

**[PROPOSED] ORDER GRANTING
MOTION FOR PROTECTIVE
ORDER**

      The Court having reviewed Defendant Salt River Project Agricultural Improvement
and Power District's Motion for Protective Order, and good cause appearing,

      IT IS ORDERED that Defendant Salt River Project Agricultural Improvement and
Power District's motion is **GRANTED**.

      IT IS FURTHER ORDERED that Defendant Salt River Project Agricultural
Improvement and Power District is not required to produce data responsive to the following
requests:

- Demand data: Separately for self-generation customers, Community Solar
customers, and non-solar customers by rate class (*e.g.*, E-26, E-27, Community
Solar, etc.), data showing demand for SRP-provided electricity (kW) by 15-
minute interval for each day for at least three years and daily peak demand for
each day for at least three years to the present. . . . Please provide data in all

1   fields necessary to identify the requested information for each customer

2   separately (e.g., customer id no. etc.) and each customer's stratum.

3   • Usage data: Separately for self-generation customers, Community Solar

4   customers, and non-solar customers by rate class (*e.g.*, E-26, E-27, Community

5   Solar, etc.), data showing usage of SRP-provided electricity (kWh) by 15-

6   minute interval for each day for at least three years to the present. . . . Please

7   provide data in all fields necessary to identify the requested information for

8   each customer separately (e.g., customer id no. etc.) and each customer's

9   stratum.

10   • Distributed generation data: For each self-generation customer, data showing

11   generation of electricity (kWh) by 15-minute interval for each day for at least

12   three years to the present. . . . Please provide data in all fields necessary to

13   identify the requested information for each customer separately (e.g., customer

14   id no. etc.) and each customer's rate class and stratum.

15   • Community Solar generation data: For each Community Solar generating

16   facility, data showing generation of electricity (kWh) by 15-minute interval for

17   each day for at least three years to the present. . . . Please provide fields

18   necessary to identify the data for each generation facility separately.
